à

Sir S. R. MORSS
R.3. - BRADFORD
Mass.
U. S. A.

Sir,

We have been very pleased in reading that you have tuned in a french program transmitted on 832 Kc/s from 7.53 to 8.20 GMT the December 14th.

I had the pleasure of informing you that the program you heard was transmitted by the Chaîne Nationale's transmitters and that the 832 Kc/s frequency is the QUIMPER QUIMERCH transmitter's one (10 Kw). We thank you very much for your report of reception and we are glad to note this beautiful fact.

Besides, I inform you that we broadcast daily from 1.55 to 3.45 GMT a program beamed to United States and Canada on 9550 and 11845 Kc/s. I hope you can tune in this program without difficulty.

So to enable you to identify the stations you may tune in, I herewith enclose the present schedule of our short waves transmissions and the list of our stations in use.

I beg to remain, Sir

Yours very truly.

pr. Le Directeur Général,

Lamoitier
