Dear Mr. Morss,

we are pleased to be able to inform you that the tape recording which you made in January contains a programme of our station. The recording, as you can imagine, was of special interest to us and has been examined by various sections of our station. Our technical department has tried to evaluate it also on the basis of the international SINPO standard and in doing so gave it the grading '2'. If the frequency of our station can be heard in North America, then that can only be possible because of superrefractions and reflections in the ionosphere, that is to say because of reception conditions which are not permanent.

Thank you very much for the trouble you took with the recording and your report. We are enclosing in our letter our official QSL-card.

We are returning your tape with our most grateful thanks.

Yours sincerely

DEUTSCHLANDFUNK

(Dr. Lüder)
