

WIMO

1000 Watts - 1300 KCS . . Studios and Transmitter - Monroe Highway . . Winder, Georgia

Mr. S.R. Morss
Bradford, Mass.

January 22, 1953

Dear sir:

I am happy to confirm your "DX" report of my stations couesty broadcast on the morning of January 18, 1953.

Your report was complete in every detail and I'm especially proud that our signal reached your state of Massachusetts.

Weather at the time of our broadcast was cold (temperature about 32) with intermittent rain. Station equipment is Gates.

Winder, Ga. is located approximately 48 miles northeast of Atlanta with a population of about 3500. Main industry in the town itself is numerous mills producing mens work clothes and slacks etc.. Theres also quite a bit of broiler raising.

Once again thanking you for your accurate "DX" report I remain,

Yours truly,

William R. Powell
Chief Engineer-Announcer
