Mr. Stanwood R. Morss
RR #3
Bradford, Massachusetts

Dear Stan:

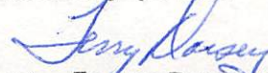

This letter will verify your reception of a special DX Program broadcast from WDBQ in cooperation with the National Radio Club. This program was broadcast from 2:00 AM to 3:17 AM CST on Monday, January 26, 1959.

Radio Station WDBQ operates on 1490 kilocycles with a power of 250 watts unlimited.

We regret that interference on the 1490 spot on the dial was heavy during the period of our DX Broadcast causing you some difficulty in hearing our special DX program. The "unmodulated carrier" which gave you trouble was also causing many other DXers across the country a lot of "headaches".

May we thank you for your report of reception of this special program, and assure you that it was a pleasure for WDBQ to cooperate with the National Radio Club.

Sincerely yours,

For: Terry Dorsey,
Program Director WDBQ

By: Len Kruse
National Radio Club

PS...We are happy to tell you that we received eight nice reports on the DX from New Zealand.
