Bradford, Mass.

Dear Mr. Morss:

This is to verify your greatly appreciated report of your reception of WCNT on the date of August 15th. These reports are very helpful to us, as they constitute one of our chief means of checking our coverage and signal strength at distant points.

The equipment we are using is the Gates Type BC 1-E transmitter, operating into a 220' Wincharger vertical radiator.

We are pleased to inform you that you monitored the initial equipment tests of our station.

Thank you again for ~~you~~ your response.

Cordially yours,

WCNT RADIO STATION
