Bradford, Mass. 01830

Dear Mr. Morss:

This will verify receipt of your report regarding equipment tests on WMCL on November 20. The information you supplied is correct.

WMCL is a new station and will operate with a power of 250-watts, non-directional, daytime only. Our transmitter is a Gates Model BC-250-GY and our antenna is a uniform cross-section guyed tower, 220-feet high, located on a hill 545 feet above sea level.

We appreciated hearing from you.

Best regards,

A handwritten signature in cursive script that reads 'Fred Cline'.

Fred Cline  
Chief Engineer
