

WANE

CBS AFFILIATE

FORT WAYNE, INDIANA

March 7, 1950

S.R.MORSS
R-3, Bradford
Mass.

Dear Sir:

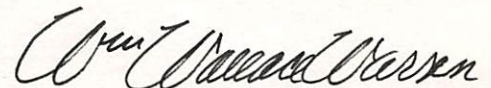

We want to thank you for your interest in writing to us on the reception of our signal in your area. This is the first occasion since our initial broadcast on March 1, 1948, that we have had any DX listeners from Massachusetts. We are always glad to hear from any of the National Radio Club Memebers.

This is to verify the correct data as given in your log. This period of operation was scheduled to test our equipment and keep in the running. We just redesigned our modulator in order to cut down our harmonic distortion, and were very pleased with the results. All this is for obtaining information for our proof of performance of the audio equipment at WANE.

Incidently we are on the air periodically, once a month, with a frequency check with Peterkin Laboratories in Detroit, Michigan, the primary standard in our area. The transmission is scheduled on the third Wednesday of each month at 2:15 am, having a duration of fifteen minutes. A modulated tone at approximately 500 cycles, varied every five minutes, with voice announcements at the beginning and end of the period is used to complete our check.

Thanking you again, I am,

Yours truly,

Wm Wallace Warren
Chief Engineer WANE
