Bradford, Mass. 01830

Dear Stan,

Thank you very much for your tape and reception report of our recent test transmission.

I am pleased to verify your reception of WKXO, 1500 kHz., 250 Watts ND, from 12:28 to 12:41 a.m. E.S.T. Monday, February 14, 1977.

WKXO uses a 143 foot non-directional antenna and a Gates BC-250GY transmitter, giving a nominal daytime range of 75 miles. In two days we've had reports from Provincetown MA to Lincoln, NE, Marquette MI and Guelph, Ont. to Gainesville FL, and over 30 places in between.

Once again, many thanks for the tape and report.

Vy 73 and gd DX,

Chris Bobbitt

QSL Manager

P.S. The old stamps are quite nice, too.
