Mr. Stanwood R. Morss
Route 3
Bradford, Mass.

Dear Mr. Morss:

I am in receipt of your letter reporting on reception of WSON during our special test program for the National Radio Club. Please accept my apology for being so tardy in answering your letter, but I've had to many verifications to send out that I've got quite a bit behind. I've really received a lot of nice reports from all over the country. I never dreamed that a little 500 watter could get out that far. I was sorry to hear that the other station had a tone on over me, but of course it couldn't be helped.

After checking your letter with my log, I take great pleasure in verifying your reception of WSON on Nov. 15, 1955 from 3.31 to 3.47 AM CST. If I can be of any further assistance, please advise.

Very truly yours,

D. E. Gibson
Chief Engineer
