KPEL

1 April 1958

Mr. S. R. Morss

R-3, Bradford, Mass.

Dear Mr. Morss,

For some unexplained reason, your reception report is just now reaching my hands. I never did see your first, however, this will confirm your reception of this station on the 21st of Oct., 1957.

I am sorry that such a delay occurred, as ~~xx~~ I am generally prompt on the various confirmations, reason being that I am genuinely interested in the performance of the transmitter plant, as well as propagation phenomenon. To date, yours is the furthestest point of contact of this station.

The transmitter here is the G.E. XT-1-A, 1000 watts daytime power and 500 watts nighttime power.

Thanks again for you DX report.

Yours truly,

Charles L. Guidry

Engineer, KPEL
