

KROF

ABBEVILLE BROADCASTING SERVICE, INC.

ABBEVILLE, LOUISIANA

3 October, 1948.

Mr. S. R. Morss.
R.R. #3
Bradford, Mass.

Dear Mr. Morss,

This is to confirm your report of 29 September, 1948. The entire engineering staff of station KROF is appreciative of this, as it is a fairly reliable indication of the efficiency of our radiating system, and the quality of our transmission.

The transmitter in operation here is a Western Electric type 443A-1, used in conjunction with the 25B speech input equipment. Radiating system in the conventional series fed vertical tower, 255 feet in height. Rated carrier power, 1KW.

Again, and in behalf of the entire engineering staff, I wish to thank you for your report.

Sincerely,

Gordon B. Anderson
Maintenance Technician
