Bradford, Mass.

Dear Sir:

I am very glad to have heard from you and I am happy to verify your report. I see from our log that we were on the air from 12:20 am to 2:34 am with recorded music for equipment tests with the carrier on and off intermittently for transmitter adjustments. That same day we began program tests at 2:50 pm.

We have a complete new Gates installation with a BC-1F transmitter, a 200' antenna, and a ground system in the muckiest mire you ever saw. The transmitter is across the river Baton Rouge, approximately 2 miles from the (West) small town of Port Allen, La.

I hope that I will again have the pleasure of verifying a report from you when we go to 540 kcs.

Yours Truly

*Charles E. Hoge*
