Mr. Stanwood R. Morss
Rural Route #3
Bradford, Mass.

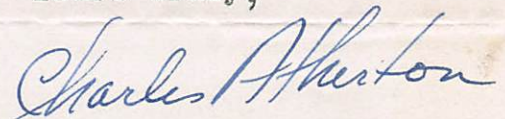

Dear Mr. Morss:

Thanks very much for your letter of September 11, 1948. The information you submitted checks favorably with the log, and you may consider this letter a verification of reception of our signal.

The equipment used at this station is Western Electric throughout, consisting of the following: Western Electric type 23C speech input equipment followed by type 1126C audio limiting amplifier, and type 451-A1 250 watt transmitter. The antenna is 212 feet above average terrain.

We appreciate your interest and wish you the best in DX-ing.

Yours truly,

Charles Atherton
Transmitter Maintenance.
