Mr. S. R. Morss  
Route #3  
Bradford, Mass.

Dear Mr. Morss:

We are indeed very grateful to you for your report on our signal as we tested our equipment on January 22nd and 23rd on a frequency of 940 kilocycles.

We are using a Western Electric 1 KW transmitter which is pumping into a six hundred foot (600') self-supported steel tower. We had great hopes of putting out a good signal but frankly we are amazed at the results of our rig.

We thank you again for your interesting report and should you ever pass our way, please drop in for a visit.

Sincerely,

*H. F. Wehrmann*
