Dear Stan:

Nice to hear from you. I have the pleasure of verifying your reception report in every particular. It was indeed WNSR that you heard from 0717 to 0732 EST on 11 Feb. 1977. The new call letters became effective on 1 February.

As our AM field strength in your area would not be substantial, at best a few tenths of a millivolt per meter, successful reception probably would take a certain degree of effort and concentration. It helps us to know that you found reception good.

Best wishes in all your radio endeavors.

Yours sincerely,

A handwritten signature in dark ink that reads 'Rick Levy'. The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Rick Levy, W1HGR
