TOWSON, MARYLAND

November 15, 1956

Mr. S. R. Morss
R-3
Bradford, Mass.

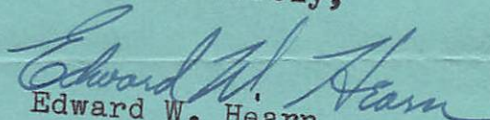

Dear Mr. Morss:

This is to acknowledge receipt of and to confirm Report on our Special Test for the National Radio Club on 11 November 56 from 4:30 AM to 5:00 AM, E.S.T.

Atmospheric conditions were not conducive to the best of reception. In fact earlier that morning we were treated to a display of the Aurora Borealis for almost a full hour. This is indeed a rarity in Maryland.

I hope we will be able to again conduct another test in a few months with better operating conditions.

Yours Sincerely,

Edward W. Hearn
STATION MANAGER
