FRANKLIN BROADCASTING CORPORATION

FARMINGTON, MAINE - TELEPHONE 3000

January 4, 1960

Dear Mr. Morss;

Katie-J is very happy to verify your DX of an equipment and frequency test conducted on Feb. 1, 1960. Your log corresponds completely with the X mtr log here. The frequency test was conducted from 1:04 AM EST to 1:08 AM EST.

Here at Katie-J we use a BC-1T 1KW Xmtr. coupled to a 198' series excited tower having a radial copper ground system 250' in length.

Sounds like you have a very fine setup there for DXing signals.

For the frequency test the night of Feb. 1, 1960 we used amplitude instead of tone modulation. According to the Crystal Corp. that calibrated our frequency equipment that night, there was no distortion with an 8-9 reading. Great night, I would say for electronic communicating.

Our next scheduled frequency test will be April 4, 1960 between 12:45 AM and 1:15 AM EST. Please be so kind as to verify any reception at that time. Katie-J will use Tone Modulation. Also Monday mornings between 4:00 AM and 5:30 AM EST Katie-J conducts equipment tests.

Hope to hear from you soon.

Sincerely,

D. E. Harrison
Chief Engineer
