Mr. S.R. Morss
R.R. #3
Bradford, Mass.

Mr. Morss:

This is to acknowledge the receipt of your letter reporting the reception of our station between 6:32 AM and 6:47½ AM on Jan. 13, 1961.

I also certify that the programming that was listed as received by you was correct. I was the DJ on duty at the time, and remember the programming at the time.

Since this is the first DX report I have received at WRUM, I am not too familiar with the format for a letter of verification. Therefore, if I have left anything out which should be included, please let me know and I will include it in a new letter of verification.

We operate at 1000 watts of power, from a Gates transmitter using two type 833 tubes in the final, and high level modulation.

Our present hours of operation are from 5:30AM to 4:30PM. These hours will lengthen as the days lengthen.

Sincerely,
Donald W. Willhoite
