S. R. Morss
R-3 Bradford, Mass.

Dear Mr. Morss,

Many thanks for your informative letter of April 19. We are always glad to hear from you DX'ers around the country, especially way out east where you are located.

Your logging was correct for April 18th reception of this station. At the time, we were conducting proof of performance checks on our equipment. We operate with 1,000 watts, a Gates BC1F transmitter feeding a ^{TOWER} quarter wave length in height.

You have some fine receiving equipment. Lots of luck in future DXing and hope to hear from you again.

Sincerely,

Herbert J. Schumaker
