Bradford, Mass.

Dear Sir:

I would like to verify your reception report of this station on October 1, 1957 between 1:01 and 1:07 AM. At that time we were testing our new 5000 watt transmitter which was put into regular operation on October 17, 1957.

Since our increase in power to 5000 watts we are using the Gates BC-5P 5000 watt transmitter and all Gates associated equipment.

Thanks a lot for your report. Hope to be hearing from you again soon.

Yours truly

J. B. Skelton, Jr.
