WMIT 36,000 watts, 106.9 on the FM dial

March 8, 1968

Mr. S. R. Morss
Rt.3,
Bradford, Mass.

Dear Sir:

Thank you for your letter relating to reception of the test of our auxilliary transmitter on March 5, 1968. Your information relating to the test is correct, and I take this means to confirm your report of listening to WFGW.

Our normal operation is with the 50 KW transmitter, however the Commission requires a test operation weekly of our auxillary transmitter.

We also operate WMIT, the oldest FM Broadcast Station in the South, and fourth in the Nation.

Thank you again for the letter.

Yours very truly,

William L. Clements, Jr.
