250 WATTS

HENDERSONVILLE, N. C.

January 22, 1947

S. R. Morss  
R. #3  
Bradford, Mass.

Sir:

I am pleased to answer your report and to verify your having heard this station between 4:26 & 4:35 AM E.S.T. Nov. 6, 1946. We're sorry you had to wait so long for a reply, but as you know your first letter was misplaced.

We have gotten quite a few letters from DXers in Penn., Mass., and even Maine. It seems almost at times that WWDC isn't as strong in New England at times as we are. It's a matter of skip of course and I know that other 250 watters do as well in the early AM. Nevertheless I was more than pleased to get your report.

We are Gates and Western Electric equipped with World Transcribed Music and AP News. No chance of a power increase now or later.

Glad to hear that you have an SX42. They are strictly ok. Another one of the engineers, James Hart, did a freq. run the 21 of this month. If you heard him you might drop him a line. He might be the new chief engineer as I am leaving next week for WFVA Fredericksburg, Va. So if you get WFVA you might ship me a letter there.

Thanks again.

  
Harold Green, Chief Engineer
