Dear Stan---

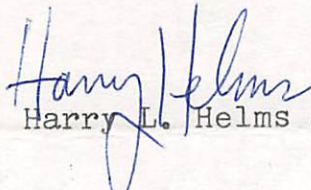

This letter is to verify your reception of WIXE on February 23, 1970 during their DX test for IRCA. You heard WIXE from 0103 to 0122 AM EST, at which time they were 500 watts, nondirectional.

The staff at WIXE were so pleased with the results that they are considering running another test come summertime down here. This is June 21st of which I am speaking, as summer starts about today down here!

Many thanks for your report. It is typical of the many fine reports from NRC/IRCAers recieved.

73 and good DX.

Yours truly,

Harry L. Helms Jr.
