RR #3 - Bradford - Man.

Dear Stanwood -

We had hoped that this would be a very personal note of thanks and verification for your logging of WNNJ during our special DX Program on Sunday morning, February 20, 1955. Our original intention was to send you each a tailor-made, chatty note about your letter with a personal vote of thanks for having tuned us in.

However, from the appearance of our mail bag - it looks as tho just about every DX'er in the States - and even Canada and parts of Mexico was looking for WNNJ at 1360 that Sunday morning from 4 to 5. Checking your report - you've copied a pretty authentic portion of our broadcast material for that special show.

So many of you included praise for our live talent - the Blue Mountain Boys - that they, too, extend thanks and appreciation. WNNJ is mighty happy to know that so many of its DX Fans pulled in our 500 watts signal. Newton, New Jersey, is a small country city of about 5,900 resident population during the cold months. The city, itself, is in northwestern New Jersey - and is considered the heart of the great northeastern dairy country. It is a region which abounds in lakes and vacation resorts. The Blue Mountain Boys are great favorites since our population is enthusiastic about country and western music. We try to broadcast a varied menu of entertainment as an independent regional station can do.

Many, many thanks again for logging us and we're happy to verify your report. If you ever get around this section, please stop in and see how a very small station puts out a fine signal. We'll be looking for you, and thanks again, for writing.

Most sincerely,

Ted
