Mr. S.R. Morss
RFD 3.
Bradford, Mass.

Dear Mr. Morss:

Hi there DX'er and welcome to the fold!

This makes New England complete for us. Mass/, was the only state we had not heard from in that vicinity.

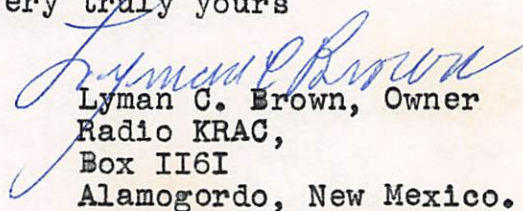

You were there all right. Your tally checks out with our program sheet to the second. And many thanks for your report.

KRAC is located just 10 miles from the White Sands, and sits right at the foot of the Sacramento Mountains. Our equipment consists of a 1,000 watt Gates BC-IJ Xmitter, series fed to a tuning box and then shunted into a 192' tower. Our ground system is standard, 120 radials of 150' and 120 radials of 50' feet in length. Each radial is tipped with a five foot copper clad ground rod. We are sitting on good adobe ground that gives us a fair ground.

We have heard from every section of the United States except the far South-East. Will probably never reach that, since we are just two miles from the Sacramentos which stretch off to the eastx and south.

Thanks very much for your report. Look forward to hearing from you again.

Very truly yours

Lyman C. Brown, Owner
Radio KRAC,
Box 1161
Alamogordo, New Mexico.
