Mr. S. R. Morss  
Route 3  
Bradford, Mass.

Dear Mr. Morss

Thank you for the report. It was a pleasure to run a test program for you fellows of the National Radio Club.

Please accept this letter as a VERIFICATION OF YOUR RECEPTION REPORT, which stated that you received our test transmission on the morning of Dec. 26th 1949. Your reports checks with our logs.

Nearly everyone reported interference from the Mexican alnighter, and it was especially bad in the West.

Equipment used here is mostly RCA. We are also an FM station and therefore our transmitters are located on a 2100 ft. hilltop and the soil is rather dry and rocky.

Thanks again for the report and best wishes for your DX scoreboard.

Cordially yours

*Bill Amidon*  
W. N. Amidon  
Chief engineer.
