Mr. S. R. Morss
Route 3
Bradford, Mass. 01830

Dear Mr. Morss:

This letter is to confirm your reception report dated December 29, 1975. According to your information you did receive WANR from our night time transmitting facility.

WANR operates during the nighttime hours from a six tower inline array beamed zero degrees true. The daytime array is a six tower box design beamed 170 degrees true. The two transmitting sites are located twelve miles apart.

I am enclosing coverage maps for your information.

Sincerely,

James S. Hartzler
Engineering Manager
Raystay Co.
