

W F I N
FINDLAY RADIO COMPANY
FINDLAY, OHIO

January 6, 1942

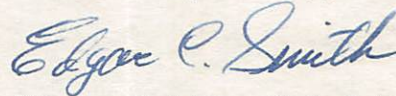

Mr. S. R. Morass
R. R. # 3
Bradford, Massachusetts

Dear Mr. Morass:

We are in receipt of your communication of December 21, 1941 concerning reception of W F I N between 9:00 and 9:36 A. M. This will verify your report. It is correct according to our logs.

Thank you very much for your report and for your interest. W F I N is operating on 1330 kilocycles with power of 1,000 watts from local sun-up to local sun-down. We hope you may be able to visit our studios when all construction work is finished. Due to delays in securing materials we have not been able to get everything completed as yet. We hope to reach that stage around the last of this month so that we can have our formal opening at that time. We extend an especial invitation to you for the formal opening.

Yours very truly,

Edgar Smith, Chief Engineer
