Mr. S. R. Morss
R. R. 3
Bradford, Mass. 01830

Dear Mr. Morss:

This confirms your report of reception of Radio Station WIXY of Cleveland, Ohio.

WIXY operates on 1260 Kc. with five thousand watts power. We have a 24 hour operation and are off-the-air only from Sundays at two hours after midnight until 5:30 AM Monday morning.

Our studio-transmitter is located eight miles south of Cleveland in Seven Hills, Ohio.

Alternate main transmitters in use are RCA models BTA 5F and BTA 5R1.

A five tower in-line antenna array of quarter wave radiators is employed during the night pattern and three towers during the day pattern. The day time array is a triangular configuration with one 5/8 wave length radiator.

A test and maintenace period is held during the off-the-air period noted above.

A frequency test is held at 0200 hours the 2nd Monday of each month.

Many thanks for your excellent report and the best of D X to you.

Very truly yours,

A handwritten signature in blue ink that reads 'Gary Weber'.

Gary Weber
Chief Engineer
