

MORTENSON BROADCASTING COMPANY
WSUM 12721 ABBEY ROAD, CLEVELAND, OHIO 44133 (216) 237-3300

January 8, 1979

Mr. Stanwood R. Moss
RT 3
Bradford, Mass. 01830

Dear Mr. Moss:

Thank you for your reception report of WSUM on December 17, 1978.

Your letter was forwarded to me from WSUM and I did not receive the cassette, perhaps someone at WSUM misplaced it. We will try to locate it as I am anxious to hear it.

I hope this letter will serve as verification of your confirmed reception of WSUM.

Radio Station WSUM operates with 500 watt at 1000 Khz on the AM Dial. The antenna system is a four tower directional array with the main lobe of radiation in a northeast direction.

I have been wanting to run a special test some morning when WCFL is off the air but scheduling such a test has been difficult since it means a 60 mile drive for me and with the many stations in our corporation planning two months ahead is rough.

Good luck with your DX.

Sincerely,

David S. Johnson
Technical Director
Mortenson Broadcasting Company
