Dear Sir:

Many thanks for the report of 31, Oct. 1946. I hope this letter will suffice for a confirmation. Your report was correct in all ways as I was the engineer and announcer. I was waiting for a politician to come in to the studio so I could make a recording to be used on a network and decided to run a few discs to pass the time. The program wasn't a regular one but we expect to be on with a night-hawk program one of these evenings. We'll make an announcement in some of the SW magazines.

Our transmitter was on 1400 Kc. as you stated and running about 250 Watts or a wee bit less. WJLB must give us some QRM because we also had another report from Buffalo, NY. and there was interference from the same station.

Many thanks again for the FB report.

Sincerely,

Richard A. Kerlin
