Blanketing the Mainline Between Johnstown and Altoona

500 WATTS

MAINLINE BROADCASTING CO.

PERSHING 6-8000

Portage, Pennsylvania

Dear Stan,

Many Thanks for the reception QSL. I hope this letter will confirm and be satisfactory for your hobby. At the present time we have no regular QSL'S. As a ham radio operator I know what a thrill it is to DX. The Age here is 19 and I started to work here about 3 months ago. The night that you received my signals I was making a frequency check which I make every 4th Thursday (post mid-nite WED) at 12:30. My rig here is a Collins 550 A., which runs 500 Watts output. There are a pair of 4-250A's in the final modulated by a pair of 4-250 A's.

So to conclude Stan I hope you all the luck in the world with your hobby and if you get the time drop me a line I would love to know how many stations and countries you have logged. So 73 and Take it easy
