S. R. Morse
R-3 Bradford
Mass.

Dear Mr. Morse

Thank you for your fine letter received today confirming our signal in Mass. - You are correct about the programming with you heard - and I am very surprised we are even being heard in Mass. - much less that clear.

- The Station here runs 1000-watts non directional Day - 1000-watts Directional (south) nite - you heard us under non-directional conditions - frequency is 1280-KC -

Of course you have a very fine receiver and antenna - just wonder if you are also a ham - By any chance - the (mine) call here is W3JL/4 - If you are not on the air yet - hope to meet you on the air real soon -

- Thanks once again for your report and keep listening to our Station

Tim Coleman
