Bradford Mass.

226 East Jefferson St.
York, S.C.

Dear Sir:
Thank you very much for listening to our station WYCL on Dec. 19, 1958 at 5-15 PM. It is very gratifying to hear from you and to realize our signal is getting up there in Mass.

I was interested in you saying your receiver is an HQ 150. Good old Hammarlund. They manufacture these receivers at Mars Hill N.C. (about 95 miles from here). I've had an HQ 140 XA for about two years and also operate a Viking Ranger Transmitter (mostly on the 15 meter band) Waked into Uruguay, Anttamerica, Germany, and London England - also operate a TV business so my amateur contacts are seriously neglected these days.

My amateur call is K4GZM - was wondering if you are as "ham" operator also.

I fire up the transmitter WYCL periodically after midnight and would be happy to arrange a schedule with you sometime if you'd like.

Beth sign off for now and there is "Gun Smoke" on the TV and see how Matt D. + Chetan are doing -
Thanks again for your report + let me hear from you again -
with best regards
Charles A. Miller C.E.
