VERIFICATION

Mr. Stanwood R. Morss
R. R. No. 3
Bradford, Massachusetts

Dear Mr. Morss:

It gives me great pleasure to verify your report on the reception of our station. I have received more than fifty letters from DX listeners in twenty-one states as widely separated as New York, Texas, Colorado, California, and Ontario, Canada. It certainly is gratifying to know that this little station is capable of such a strong signal at so great a distance. You were listening to our second morning's equipment test.

The transmitter is a new Collins 250 watt, using a pair of parallel 810 tubes in the final amplifier. The antenna is a conventional 270 foot guyed tower with a ground system fanned out in mud and water.

Our next frequency check will begin at 1:30 A.M. C. S. T. February first, and probably monthly thereafter. We expect to begin regular program operation about February second, daytime only.

On behalf of the entire staff of WIRJ, may I say thanks a lot for your kind letter and good report.

Sincerely,

R. E. Van Loon

R. E. Van Loon
Chief Engineer

Mr. Morss, please excuse the delay in getting this in the mail, we have been awfully busy around here. Thanks again for your response.

R. V.
