S. R. Morse
Route #3
Bradford, Massachusetts

Dear Mr. Morse:

I'm sorry we haven't verified your report of reception of our station last October.

I came to K A D O as chief engineer on February 1st this year, and haven't as yet found all reports of reception which DXers have again asked to have verified. I don't know what the previous engineer did with the reports. Since I've been here, I have received several letters from DXers telling me that their reports were never verified. I suppose it is because the first engineer is a ham, and has his hands full there. His name is Herschell McClure, and he has moved to Lewiston, Idaho. Offhand, I can't remember his call letters.

As to your report, it agrees with the information I found here when I came to work. At the present time, our frequency measurement schedule calls for a tone test from 5:00 am to 5:15 am CST on the 13th of each month.

K A D O is a DA/D station, and operates 5:55 am to 6:00 pm on weekdays and 6:55 am to 6:00 pm on Sunday.

I'd like to take this opportunity to wish you good fortune on your DXing and hope you WAS, (if you haven't already!)

Sincerely,

Joe Granger
