Rt. #3  
Bradford, Mass.

Dear Stan:

Was looking for a report from you on our DX of the 14th, and was most happy to find it in this AM's mail.

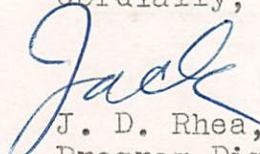

Please consider this letter, short as it may be, verification of our signal between 2:00 AM and 2:31 AM, Central Standard Time, on 14 November 1955, as we conducted a DX-Test for the NRC.

Your report is very complete, and details check 100% with the log. Many thanks, Stan -- and please forgive the short letter. We've been flooded with reports, and I'm trying to get them all answered before the week is out.

Everyone reports much static, except the California boys... and several report deep fading, but this is more-or-less restricted to the North-East. We're most happy with the results... and sorry that weather wasn't a bit better!

Don't forget -- I'll be at KIOX after 3 December, so if down Bay City way after that date, stop by for a cup of coffee!

Cordially,

  
J. D. Rhea,  
Program Director
