

K S T A

COLEMAN COUNTY BROADCASTING CO.

JACK SOUTH, MANAGER

Coleman, Texas

December 17, 1947.

Mr. Stanwood R. Morss
Route 3
Bradford, Mass.

Dear Mr. Morss:

At this late date I am confirming your reception of the KSTA equipment test conducted October 26, 1947. Please accept my apologies for this late confirmation. Our sights were really lifted when we heard from you in Bradford, Mass., and as I later told an associate in a light moment, "we're really covering the Coleman trade territory."

You will be pleased to know that yours seems to be the farthest reception we have had reported. I am therefore enclosing a check for the five bucks you have won. We heard from many states, including Washington, Idaho, New York, Pennsylvania, Minnesota, and others, but according to our calculations your town is more air line miles from Coleman than any others who reported reception of KSTA.

I believe you may be interested in hearing that one of our daytime broadcasts was recently heard from northern Minnesota--Hill City is the town.

Write us again some time, and thanks again for reporting KSTA reception in Bradford, Mass.

Yours sincerely,

Jack South
