STAUNTON, VIRGINIA

February 5, 1955

Mr. Stanwood R. Morss
R. R. No. 3
Bradford, Mass.

Dear Mr. Morss:

WAFC is proud to verify your reception of our signals from 4:40 to 4:50 a. m. EST on Wed., Feb. 2, 1955. Your report of reception was correct in every detail including the name of the gentleman who checks our frequency.

We surely go in all directions at night because we also had a report from Ponca City, Oklahoma, from a Mr. Henry W. Ward, 404 North 14th St.; also one from Toronto, Canada and one from Geneva, Nebraska.

The transmitter of WAFC is a Gates Model BC-1F, with a power of 1,000 watts operating on 900 Kc. with high-level modulation. Our antenna is a triangular guyed affair 255 high.

Wishing you every success, we are,

Cordially yours,

RADIO STATION WAFC
