January 15, 1947

Mr S R Morss
R-3 Bradford, Mass.

Dear Mr Morss,

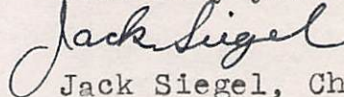

I am in receipt of your DX report dated January 13th 1947 on our initial tune up and test program.

We appreciate your report and checked the enclosed information with our log of that morning, your information checked with our log.

We are using a Collins 20-K transmitter with 1,000 watts of power, our antenna consists of a vertical radiator uniform cross section guyed tower, 205' above the insulator. Our ground system consists of 135 ground radials with another 135 used as a screen near the base of the tower.

We again wish to thank you for your kind DX report and hope you pick us up again on another test.

Sincerely yours,

Jack Siegel, Chief Eng.
