

WNIS 1350

News/Talk Radio

ANN

206 West York Street, Norfolk, VA 23510 (804) 622-5591

Dear DXer:

This letter will confirm your reception report on our station dated *Oct 25 1980* from *630PM* to *655PM EDT*

A little bit about our station--we operate at 5KW fulltime; with separate antenna patterns for day and night operation. Our antenna array consists of three towers. I'm enclosing day and night coverage maps.

Our main transmitter is a CCA Electronics model AM5000DS; with an RCA Electronics model BTA5U as a standby.

WNIS has been on the air since April 2, 1979 with its news/talk format. Under previous owners, this frequency has been occupied by WHNE, WKLX, WCVU, WAVY, and when it first went on the air at 1350 KHz in 1942, I'm told, the call letters were WSAP.

Thanks again for your reception report. I'm also enclosing a few other items about the station.

Sincerely,

Doug Boynton
Operations Manager
