Mr. S. R. Morss  
Route # 3  
Bradford, Massachusetts

Dear Mr. Morss:

This will acknowledge receipt of your letter and reception report. I am very pleased to be able to give you a reception verification.

For the past week we have been testing nightly a new 5000 watt Collins transmitter on a newly assigned frequency of 1580 KC from 1230 KC / 250 watt.

From all indications we must be radiating at low angle the DX reports are pouring in and a great number of them are from the middle west.

I appreciate your report and want to thank you for the interest shown.
