Dear Mr. Morss:

What a great radio you must have! You're the farthest-away listener we've had since going on the air 30 November 1968.

The other far-away listener we had was one rainy Saturday two weeks ago in Hartford, Conn., who called us up to tell us we were coming in loud and clear. We figure it must have been some sort of fluke because of the weather conditions.

The announcer who signed off the day you picked us up is Gary D'Arcangelo, our program director. Our morning man is Gene Buffer.

In your note, you mentioned a "verification" of your report. If this is okay, let it stand as acknowledgement of the report.

While I'm the general manager here, I'm not sure what an early-morning frequency check period is. Guess that's because I'm as green in radio as our stationery. I'll check it with our chief engineer.

In your note, you wrote:..."and I am enclosing a report of reception and a tape of what I heard."

Somehow, the tape is missing. Don't believe it came with your note. But perhaps you meant a transcript of what you taped.

At any rate, thanks very much for taking the time and trouble to drop us a note on the reception.

By the way, isn't Bradford somewhere near Groveland, Boxford and Haverhill? Don't have a map of Mass. here, but it seems to me I've heard of Bradford being in the vicinity just mentioned. Am I correct?

Thanks again,

Sincerely, *Robert W. Smith*
