Mr. Stanwood Morss
RFD 3
Bradford, Massachusetts.

This letter is to verify your signal report of October 27, 1966.
For your information our 1 Kw signal is very useful up to about
40 miles and not too bad up to 60 miles. We're a daytimer station
and have received reports from as far as Arkansas and Texas.

And you? Perhaps I'm being facetious but have you learned
the Morss code and get your 'Ham' license?
