

TELEPHONE 1640

WEST BEND, WISCONSIN

November 24, 1953

Mr. Stanwood R. Morss
R. R. #3
Bradford, Pennsylvania

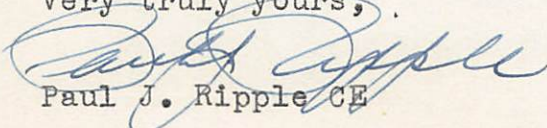

Dear Mr. Morss:

Thanks again for another report this one from your home at Bradford instead of from your car in the vicinity of Beaver Dam, Wisconsin. This seems to be my catch up day on all overlooked and forgotten DX reports. Your information contained in the report of the program test of February 7, 1953 is correct with the log at this station.

I stated the hours of operation of this radio station in another answer typed out earlier this morning. I might add that within the next six weeks there will be several tests run here due to some changes being made in the ground system at this station. These tests will not start however until after midnight C. S. T. and of course at the present time I can't say exactly what nights this will take place.

Thanking you again for your report and patience I remain,

Very truly yours,

Paul J. Ripple CE
