July 20 1994

Hello Bill,

It's been so long since you sent your report that you probably don't even remember what this is about.

My name is Tyler Everitt, and I'm the Chief Engineer for CKRX 1090 ROCKS and 1570 CKTA Country.

I was not here on July 20, 1993, but I believe your report to be accurate and true. Thank you for taking the time to listen, and subsequently write to us. We enjoy hearing from listeners, near or far.

I started here in September of 1993. Prior to that I was in Arizona, attending the DeVry Institute of Technology. A Canadian friend of mine who was also in Arizona married a girl from Colorado, so I am familiar with the area. I loved Arizona, and would like to live there permanently, but attaining a visa to stay in the country is difficult to impossible.

The station here is a lot of fun, though. I am using a Continental 10000 watt transmitter with a three tower Directional Array on CKRX.

The station is doing well, and we have had a good first year Rock and Roll.

Thank you for your interest in CKRX

Tyler Everitt
