Dear Sir:

This will acknowledge receipt of your confirmation of reception of WLAY on the morning of January 10, 1964 from 2:41 - 2:46 AM CST on 1450 Kc.

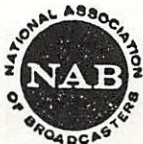

WLAY operates 24 hours daily, and the period you heard was probably when we were operating with daytime power of 1000 watts for the frequency check, as it is most unusual for a 1450 channel to reach your area from this distance.

Enclosed herewith is our sales brochure with a bit about the Shoals area, and you are correct...this is the center of the TVA area with Wilson Dam and Wheeler Dam and TVA operations being located here.

Hope this information will help you, and we do appreciate hearing from you relative to the reception.

Best regards,

D. Mitchell Self
Chief Engineer

SERVING MUSCLE SHOALS, FLORENCE, SHEFFIELD, & TUSCUMBIA SINCE 1933
