Mr. Maurice W. Nittler
Shickley, Nebraska

Dear Mr. Nittler:

This is to verify your reception of WMSL May 20th. from 12:30 A.M. to 12:45 A.M. We were on during this period for the purpose of a frequency measurement with the Commercial Radio Monitoring Company of Kansas City, Mo. This was one of our regular frequency checks. WMSL operates on a frequency of 1400 K.C. and has a power of 250 watts.

Thank you very much for notifying us of your reception of our check. WMSL is located in the Tennessee Valley on the Tennessee River in Decatur, Alabama. We are always happy to verify any DX reception of WMSL during frequency checks.

Thank you again,

Yours truly,

Carl Pugh
Chief Engineer
