Chief Engr.

Maurice W. Nittler
Englewood, Colo.

Dear Sir,

In going through my files I found a letter dated Nov. 16, 1959 stating your reception of KTCS that morning. I left the next day for the Country music DJ convention in Nashville and apparently when your letter came in the copy writer just filed it away. I am indeed sorry. I received a second card from Francis H. Nittler in Denver and started looking back and also found your confirmation.

KTCS is always glad to answer DX'ers reports and assist in any way we can, the National Radio Club, so I do beg you to accept my apologies.

KTCS is a 500 watt day time station Gates transmitter and a 176 ft. series fed tower non-directional. We are 3 years old but we came up with a new type program format thus the term all new. We promote ATP (Adult Type Programming).

I believe this letter will serve for you and NRC.

Thanks for the DX report and I will be glad to hear from you anytime, and honestly next time the reply will not be so long in reaching you.

Best Wishes

A handwritten signature in blue ink that reads "Cal Clopton".

Calvin E. Clopton Chief Engr.
