P.O. Box 112
Englewood, Colorado 80110

Dear Bill:

We were very happy and surprised to receive your letter telling us that you received our station up in Englewood. It might be of interest for you to know that we are a 1,000 Watt station with a very good frequency of 930. The only other stations on 930 around the area are in Flagstaff Arizona, Oklahoma City, Durango, Colorado and Los Angeles, California.

Your signal must have been pretty good that day, because you did a very accurate job of copying our station. And by the way we had a very nice 10th Anniversary celebration.

By the way I forgot to mention that we are running RCA bta-1r transmitter with a 212 foot tower non-directional daytime only.

Thanks for the letter.

Sincerely yours,

Ray E. Morgan
